

Addition of Fractions with Unlike Denominators

5th Grade • Mastered in 4 Steps

1

Find an
common denominator

$$9 = 21$$

2

Convert to
"equivalent"

$$4 \times = 3$$

3

Add

$$= + = 9$$

4

Simplify

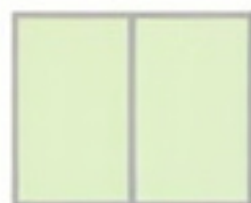

$$11 \div 2 = 5 \frac{1}{2} = 10 \frac{1}{2}$$

12. 1: Find the Common Denominator

Step 1: Find one to the common denominator.

$1/2 =$

1 whole

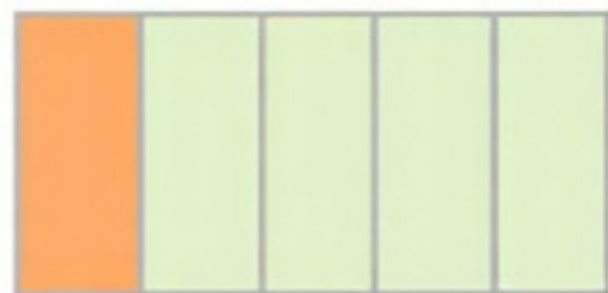

$$\frac{1/2}{13}$$

$1/2 =$

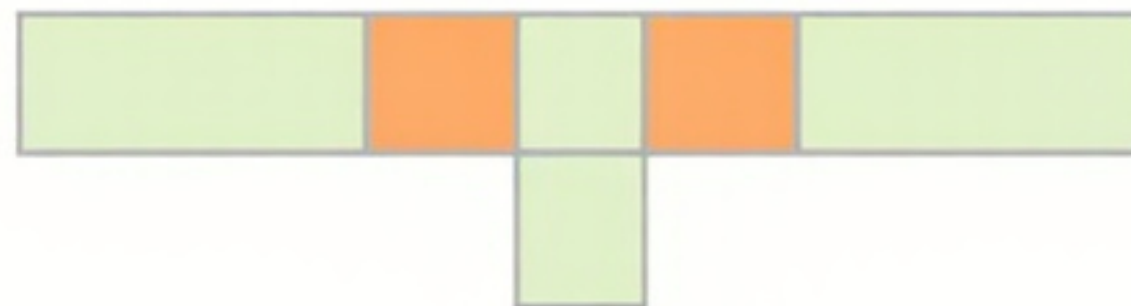

$1/3$

Common Denominator >

$$+ \frac{6}{10}$$

Common Denominator >

Step-2, 处磨中拖, 立洞
